

## DETERGENT WITH HYGIENISING EFFECT FOR PODAL BATHS

- High hygienising effect and restructuring efficacy.
- Ideal for the treatment of ruminant hooves.
- Can be used for preventive and curative use.

### SUGGESTIONS

In order to ensure the perfect shape of the hooves, it is recommended to carry out the treatment consistently throughout the year. Before bathing, it is important to preventively clean the hooves of ruminants in order not to contaminate the solution.

### DESCRIPTION

GLUTASEPT is a highly concentrated with hygienising effect detergent, containing lactic acid, glutaric aldehyde and aluminium sulphate, formulated for washing the hooves of cattle, sheep and goats in dedicated tubs.

Indicated for the prevention of lameness due to contamination of the soft tissues of the bovine, ovine and caprine foot.

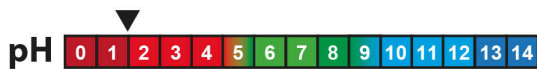

The formulation also contains a mixture of surfactants and adjuvants, field tested, that are not affected by degradation on contact with organic matter.

GLUTASEPT is effective and stable at both room and low temperatures. It does not contain phosphorus.

## DETERGENT WITH HYGIENISING EFFECT FOR PODAL BATHS

### PHYSICAL AND CHEMICAL CHARACTERISTICS

Aspect	Clear liquid
Colour	Dark green
Odour	Characteristic, sweetish
Specific weight (at 20°C)	1,06 gr/ml
pH	About 1.5

Null

### AVAILABLE PACKAGING

25Kg Can - 01AGLUSTN25  
200Kg Drum - 01AGLUS0200

### USE MODALITY

Prevention:

Dilute the product at 3% in podalic baths twice a week.

Treatment of dermatitis or weak nails:

Dilute the product at 5% in the appropriate podalic baths tubs for 5-10 consecutive days.

Then implement the prevention procedure.

**FOR PROFESSIONAL USE ONLY.**

The product maintains its properties when properly stored in an unopened package, in a cool and dry place away from light and heat sources, at a temperature between 5°C and 35°C.
