

# MAMMIGUARD

Neutral liquid detergent with elevated sanitising and moisturizing action for the cleaning of animals' teats before milking (pre-dipping).

The product contains chlorhexidine digluconate (1200 parts per million) and concentrated surfactants with elevated detergent properties.

MAMMIGUARD must be used diluted in drinking water with the special teat-cleaning cup or with a MAMMITOWEL wipe in immersion.

Its constant use proves efficient in the reduction of environmental and contagious mastitis, improving the bacteriological quality of the milk.

## USE MODALITY

### With foaming applicator:

- Prepare a 20% solution.
- Fill the tank of the applicator to approximately 2/3.
- Press the doser repeatedly until the foam rises.
- Apply the foam to the udder

### With a MAMMITOWEL wipe:

- Dilute the product to 10% with water and mix
- Immerse the wipe and clean the teats,
- Squeeze the wipe and use to dry the udder.

## PRE-MILKING CONCENTRATED DETERGENT FOR UDDERS

- Ideal for all milking stock animals.
- Guarantees the complete sanitisation of the udder.
- Reduces the risk of environmental and contagious mastitis.

## PHYSICAL AND CHEMICAL CHARACTERISTICS

Appearance	Viscose liquid
Colour	Transparent light green
Odour	Characteristic
Solubility in water	Complete in all ratios
pH	6.0 ± 0.5
Viscosity	1400 ± 300 cps
Chemical properties	Amphoteric - anionic - nonionic
Average shelf life	36 months

pH 0 1 2 3 4 5 6 7 8 9 10 11 12 13 14

## FOAMING POWER

High
